SUMMARY

MBA graduate in Business Analytics with an operations and demand-analysis background from hospitality management, now transitioning into Data Analyst roles. Hands-on project experience in Microsoft SQL Server and Microsoft Excel: analyzed 26,052 credit card transactions using T-SQL and built an interactive Excel sales dashboard with PivotTables, PivotCharts and slicers. Seeking Data Analyst, MIS Analyst or Reporting Analyst opportunities.

SKILLS

Database Management: Microsoft SQL Server, T-SQL, CTEs, Window Functions (RANK, ROW_NUMBER, SUM() OVER, LAG), DATEDIFF, Joins, Subqueries, GROUP BY, HAVING, Conditional Aggregation, Aggregations

Data Analysis: Exploratory Data Analysis, KPI Reporting, Trend Analysis, Customer & Sales Analysis

Data Visualization: Microsoft Excel, Data Cleaning, PivotTables, PivotCharts, Slicers, XLOOKUP, INDEX-MATCH, SUMIFS, FILTER, SORT, Dynamic Arrays, Excel Reporting

Tools: SSMS, GitHub, Microsoft Office

EXPERIENCE

Freelance Operations & Demand Analysis, Self-Employed, Visakhapatnam 2021 – Present

- Analyzed customer consumption trends across events to identify high-demand items and support resource allocation decisions.
- Managed order flow for catering events serving 100 – 500+ guests, tracking demand patterns and peak service timings to support operational planning.

PROJECTS

Credit Card Spending & Customer Behavior Analysis

Microsoft SQL Server, T-SQL

- Analyzed 26,052 credit card transactions totaling ₹14.07B to evaluate spending patterns across cities, card types and expense categories.
- Developed T-SQL analyses using CTEs, RANK, ROW_NUMBER, SUM() OVER, LAG and DATEDIFF to identify spending concentration, growth patterns and peak periods.
- Identified major geographic spending differences, with top cities each contributing approximately 13 – 14% of total spend while Kolkata contributed 2.83%.
- Evaluated customer spending behavior using cumulative spend milestones, expense categories, gender contribution and weekend transaction patterns to identify customer and regional spending patterns.

Blinkit Sales Performance Dashboard

Microsoft Excel, PivotTables, PivotCharts, Slicers

- Built an interactive Excel sales dashboard tracking \$1.2M total sales, \$141 average sales, 8,523 items sold and a 4.0 average customer rating.
- Cleaned and standardized raw sales data by resolving inconsistent categories and missing values before analysis.
- Analyzed sales performance across item type, fat content, outlet size, location and establishment year using PivotTables and PivotCharts with 3 connected slicers for interactive analysis.

120-Day Data Analyst Worklog

Microsoft SQL Server, Microsoft Excel, GitHub

- Maintaining a structured 120-day Data Analyst worklog documenting hands-on Microsoft SQL Server and Microsoft Excel practice, projects and analysis on GitHub.
- Organizing SQL and Excel exercises, analyses and project work in a public GitHub repository.

EDUCATION

Lovely Professional University (Online)

MBA Business Analytics

2023 – 2025

LICENSES & CERTIFICATES

- Certified in 'NamasteSQL — CTE, Subqueries & Advanced SQL' , Issued By Ankit Bansal / NamasteSQL
- Certified in 'Excel for Data Analysts'
